Angel Blogger Template Installation Documentation, a step to step guide to help you out to set up your blog easy way.

First of all, Thank you for Downloading our template if you haven't done yet you can get it from here : Angel [Blogger Template](#) . You check the live demo through the button below and also Please Read this documentation carefully in order to set up your blog and please note that there's no support for free users.

1. Installation

Open your purchase folder, you will see a file with name **Angel-(Free or Premium)-Version.xml**

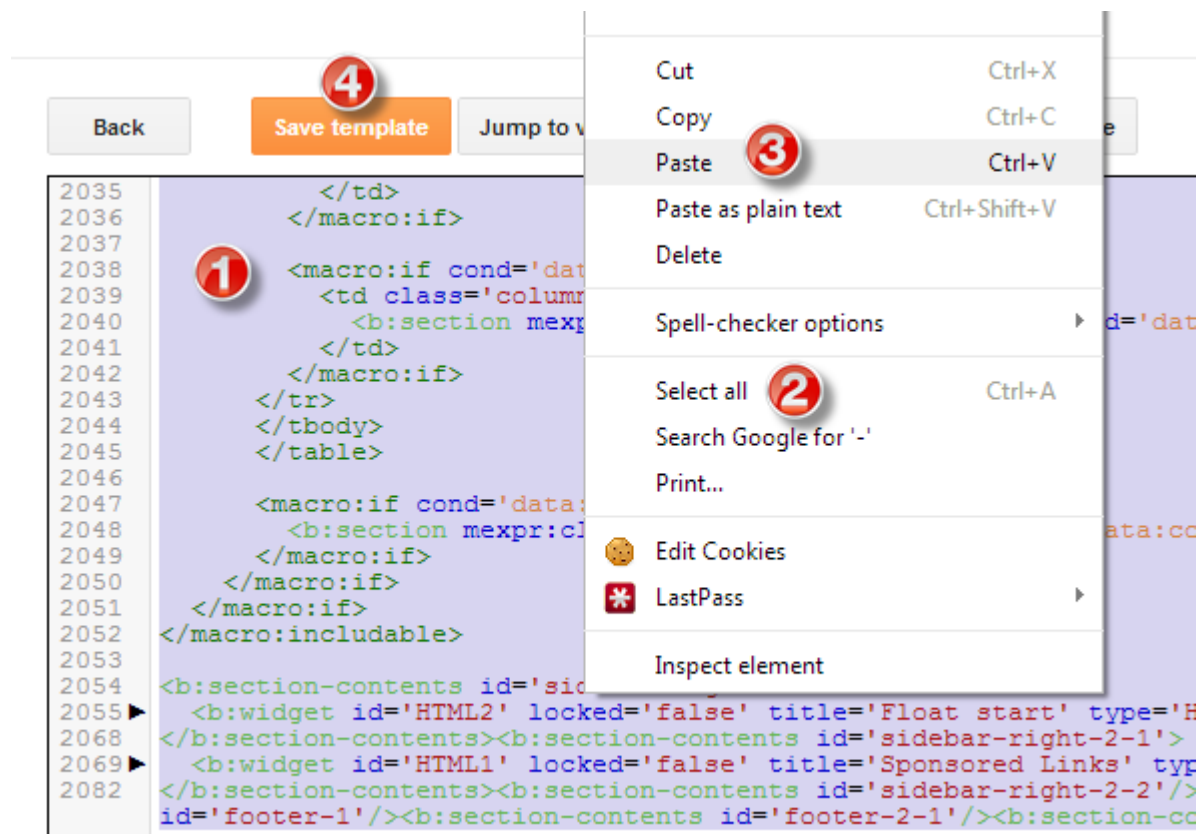

Open this XML file with a text editor (Notepad or something like that). Then select all text and copy (Ctrl+A, Ctrl+C in Window).

Return to your blog dashboard, access your **Template** menu, click **Edit HTML**

The screenshot shows the Blogger dashboard interface. At the top, there's a header with the Blogger logo and a 'View blog' button. Below this, the 'My blogs' section shows a list of blogs with a red circle and the number 1 highlighting the 'Template' menu item. The main content area displays a preview of a blog template with a red circle and the number 2 highlighting the 'Edit HTML' button. The left sidebar contains a list of navigation links: Overview, Posts, Pages, Comments, Google+, Stats, Earnings, Layout, Template (highlighted with a red circle and the number 1), and Settings.

In **Editor HTML** window, select all old code and paste the new code that you copied from the release file into code field. Then, click **Save template**.
